BLATTATHOR[™] ULTRA

ADVANCED BAIT TECHNOLOGY[™]

ULTRA CLEAR WINNER

With **BLATTATHOR ULTRA** you can expect to see cockroaches quickly start to vanish, which means greater customer satisfaction - and fewer call-backs!

BLATTATHOR ULTRA with its **Viral Feed Through Effect[™]** ensures supersonic knockdown of cockroaches. During tests with comparable gel cockroach baits **BLATTATHOR ULTRA** shot them down with lightening fast speed. And, with its high moisture retention, it keeps on killing long after others baits have gone hard and dry.

— BLATTATHOR ULTRA
 — 0.3g/Kg FIPRONIL
 — 21.5g/Kg IMIDACLOPRID

For even greater cost savings use **BLATTATHOR ULTRA** with our **ACCUTHOR[™] Precision Metered Gel Gun**. ACCUTHOR is crafted from polished stainless steel and ensures precise targeting and fast placement of all your gel baits. Unlike any other gel gun on the market, ACCUTHOR sucks the gel out of the tube under negative pressure to guarantee dosing accuracy.

- ! For Routine/Maintenance Treatments Ensystemx recommends the use of **BLATTATHOR Gel Cockroach Bait with abamectin** to protect against resistance. With its Multimode Activity BLATTATHOR Gel is a true
- Resistance Fighter, the perfect wingman for BLATTATHOR ULTRA.
