

MAGNATHOR™

MAGNETIC COCKROACH BAIT WITH MAGTHANITE®

DIRECTIONS FOR USE:

RESTRAINTS

DO NOT apply to wet surfaces or to areas that are washed.
DO NOT allow product to directly contact humans, pets, exposed food, food preparation surfaces or food utensils.
DO NOT use chemical sprays near placements of MAGNATHOR™ Magnetic Cockroach Bait.
DO NOT apply this product in places where an air-stream or other factors may cause it to move.

SITUATION

Commercial, Industrial and Residential Buildings.

PEST

Cockroaches.

RATE

Apply very lightly into cracks and crevices where cockroaches are known or are likely to be harbouring. For light infestations, a minimum of 4 - 6 bait points is recommended per 10 sq. metres of treatment area. For heavy infestations, a minimum of 12 - 24 bait points is recommended per 10 sq. metres of treatment area. A bait placement is typically about 0.05 g to 0.1 g of product.

CRITICAL COMMENTS

Inspect premises thoroughly and locate all cockroach harbourages. Place product into as many cockroach harbourages as possible, away from where it is likely to be removed by cleaning programs. Good hygiene is essential in any pest management situation. Encourage the removal of other food materials. In areas of poor sanitation use more product.

RETREATMENT

In areas of high activity further placements may be needed. Schedule a second inspection about a month after the initial treatment. Retreatments only need to be applied in areas where cockroaches remain or are likely to enter premises.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THIS LABEL UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION

Insecticide Resistance Warning

GROUP 2B INSECTICIDE

For insecticide resistance management MAGNATHOR is a Group 2B insecticide. Some naturally occurring insect biotypes resistant to MAGNATHOR and other Group 2B insecticides may exist through normal genetic variability in insect population. The resistant individuals

can eventually dominate the insect population if MAGNATHOR or other Group 2B insecticides are used repeatedly. The effectiveness of MAGNATHOR on resistant individuals could be significantly reduced. Since occurrence of resistant individuals is difficult to detect prior to use, ENSYSTEX AUSTRALASIA accepts no liability for any losses that may result from the failure of MAGNATHOR to control resistant insects. MAGNATHOR may be subject to specific resistance management strategies. For further information contact your local supplier, ENSYSTEX AUSTRALASIA representative or local agricultural department agronomist.

PRECAUTION

Should not be used in areas accessible to children.

PROTECTION OF LIVESTOCK, WILDLIFE AND OTHERS

DO NOT contaminate streams, rivers or waterways with the chemical or used containers. DO NOT place in locations which are accessible to domestic animals, livestock or birds.

STORAGE AND DISPOSAL

KEEP OUT OF REACH OF CHILDREN. Store in the closed, original container in a dry, cool, well-ventilated area out of direct sunlight. Dispose of empty container by wrapping in paper, placing in plastic bag and putting in garbage.

FIRST AID

If poisoning occurs, contact a Doctor or Poisons Information Centre. Phone: Australia 13 11 26.

SAFETY DIRECTIONS

Will irritate the eyes. Avoid contact with eyes. Wash hands after use.

MATERIAL SAFETY DATA SHEET

Additional information is listed in the Material Safety Data Sheet which is available from Ensysstex on request. Call Customer Service 13 35 36 or visit our web site at www.ensystex.com.au.

NOTICE

Ensysstex Australasia Pty Ltd (Ensysstex) warrants that this product conforms to its chemical description and is reasonably fit for the purposes stated on the label when used in accordance with Directions for Use under normal conditions of use. No warranty of merchantability or fitness for a particular purpose, express or implied, extends to the use of the product contrary to label instructions or under off-label permits not endorsed by Ensysstex, or under abnormal conditions.
