

THOR'S THUNDER

News & Views from Ensystex SPECIAL EDITION

Cockroach Traps/Insect Monitor With Lure

Lo-line plastic cockroach trap with Glueboard & Lure. For the same price as cardboard throwaways you get a professional style university designed insect trap with lure and glueboard. Act responsibly by re-using and gain the added benefit of a build up of cockroach aggregation pheromones. With its low profile, the Insect Monitor fits under objects or can be used on its side in narrow openings. It is ideal to use inside and outside residential accounts, in food processing plants and in commercial accounts.

Beta Rodent Stations

Compact Bait Station for rats and mice. This is the most cost effective rodent station in Australia, with child-resistant features, rod for wax blocks and a bar for fixing to walls. One key opens all Stations.

Mouse Station

Compact Bait Station for Mice. University designed and lockable, this is Australia's most economical bait Station for mice.

Glue Trapper Bait-free Station for Mice

No poison bait is required and mice can be discretely removed from the premises. Station comes complete with glue boards.

Rodent Stations

Alpha - This tunnel design and the low cost makes the Alpha ideal for use in perimeter baiting programs. Bora - With its domed roof the Bora provides enough room for a rat to sit upright to feed. Pilot - Our largest rodent Station provides enough room for a rat to turn around inside.

We have professional Stations at the most affordable prices for all your rodent baiting needs. One key fits all. All Stations can be printed with your company logo. Made from high grade polymer, durable, shock resistant and very competitively priced.

Thor was conceived with the idea of fundamentally changing the way you source and purchase the products you need to power your business.

The true power of Thor is the simplicity of bringing all aspects of registering, manufacturing, formulating, selling and distributing pest management products under one roof, and in the process squeezing costs by cutting out the middlemen and big company profits.

And now Thor is ready to make an even bigger commitment to YOU. Guaranteed Delivery...

Strike me lucky - It's guaranteed..

Ensystex makes this commitment to you:

If you place your order before 2pm EST, your order will leave the very same day. If you place your order after 2pm EST, your order will leave the next day.

We mean what we say.

If your order doesn't leave on time, "We will give you a 5L bottle of Maxxthor for FREE!"

Who else can offer you a guarantee like that?

Ensystex delivers your products, door to door, using Australia's leading courier services to optimise prompt receipt of goods. All deliveries, where the total order value is over \$500, are delivered FREE into your store. Actual delivery times vary depending on your location. Please enquire of expected delivery times to your region when you place your order.

We're here to help!

We're all aware that working in today's tough, demanding, fast forward environment, when a problem comes up it can make life very difficult. That's why Ensystex has a strong "help" line, dedicated to our valued clients.

If you have any technical questions or require technical support, all you have to do is call 13 35 36 and follow the prompts. We then guarantee that one of our technical support specialists will call you back within 2 hours of your call being placed to assist with the matter.

This support is available 24 hours a day, 365 days a year!

As we said, it's all about helping you when you need it most. At Ensystex we are confident that our high quality products will meet your every requirement, but sometimes you might have a question that needs a prompt response; to us that matters a lot. We also think getting in front of a challenge is smart. That's why we have an ongoing commitment to finding new ways to support and improve your business. That's why we offer training programs, have a world class laboratory for R&D in Australia and the largest team of dedicated technical reps in the country.

The pressure's on us.

And to demonstrate our desire to do the best we can for you, if we do not respond within 2 hours, we will give you a five litre container of the product in question FREE.

* Conditions Apply. Applies only to items in stock at the time of ordering. Ensystex is not responsible for the performance and prompt delivery of the courier service. Ensystex does commit to using a high performance courier.

Bithor

Granular Insecticide

2g/Kg bifenthrin

Simply the best option... for ants, ticks, fleas & turf pests.

Bithor is ideal for use in lawns, garden beds, etc. where the heavy granules penetrate through to where the pests harbour. It is also great in paved areas where it can be brushed into the cracks and crevices.

Blattathor

Gel Cockroach Bait

0.5g/Kg abamectin

The Clear Solution for cockroach baiting.

This is an advanced gel technology in a unique clear formulation that's highly palatable, highly active and has no resistance issues due to unique multiple modes of action.

Cyperthor

Insecticide

50g/L α -cypermethrin

Your powerful alternative for pest insects.

Offers high performance, through the powerful residual action of an alternative pyrethroid active with a strong flushing action.

Deltathor

Insecticide

10g/L deltamethrin

The Proven Performer.

This well-proven, high performance, quality insecticide combines the most powerful residual action with the safety features you demand. It has a high quality suspension so it lasts longer in your spray tank.

Deltathor Plus

Insecticide

10g/L deltamethrin

10g/L tetramethrin-R 25:75

80g/L piperonyl butoxide

The Resistance Fighter.

Deltathor Plus offers powerful residual action with super-fast knockdown from isomeric optimised tetramethrin. It's also synergised with piperonyl butoxide to improve action against pyrethroid resistant insects.

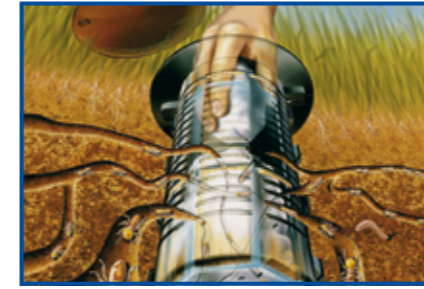

Dipthor*

ULV Insecticide

25g/L cypermethrin

For the control of public health pests.

The ULV Space Treatment offers fast action for the knockdown and kill of flying insect pests and cockroaches. Ideal for IPM campaigns and warehouses.

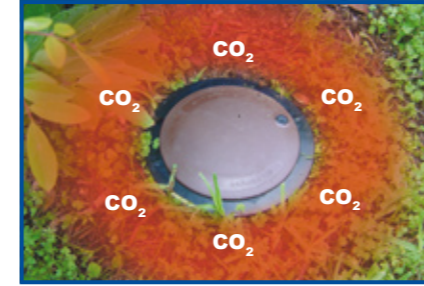

Exterra

Requiem Termite Bait

1g/Kg chlorfluazuron

The End of the Line for Termites.

Exterra is Australia's number one product for termite management. Offering ecologically responsible termite colony elimination and guaranteed long-term protection with the unique Exterra Termite Interception Zone.

Focus

Termite Attractant

Natural, food-based granule designed to draw termites into your Exterra Stations instead of people's homes.

This patented technology creates the Exterra Termite Interception Zone. With other termite monitoring systems there is nothing to stop the termite simply passing between the Stations. After all the house is just a big food source. With Focus the termites are directed into the Exterra Stations. Guaranteed.

Hymenophor

Granular Ant Bait

7.3g/Kg hydramethylnon

Simply the most advanced ant bait technology available.

Hymenophor contains a unique range of feeding attractants designed to enhance feeding in all colony development stages, it's highly palatable and highly active. It controls most black and brown ant species due to an exclusive blending of 2 sugars, 2 oils and 2 proteins in a unique palatable medium.

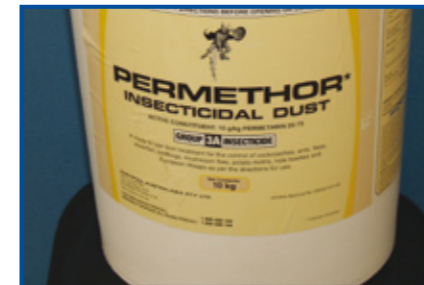

Maxxthor

Water-based Termiticide & Insecticide

100g/L bifenthrin

The 'sidewalk to sink', or 'curb to cupboard' solution for ALL your pest control needs.

This professional strength, multi-purpose insecticide / termiticide with unique micro-fine suspension gives you improved soil penetration for better termite management and faster, more effective control of insect pests.

Permethor

Insecticidal Dust

10g/Kg permethrin

Simply the FINEST dust for professional pest managers.

Permethor is an exceptionally light dust formulation that flows further and deeper into cracks, crevices and voids where pests are found and gives you superior coverage and prolonged residual performance.

Prothor

200 SC Termiticide

200g/L imidacloprid

The Protector – forms the Prothor Termite Defence Zone™.

Prothor is undetectable by termites so they can't avoid it. Prothor kills and infects termites when they enter the Defence Zone, and then kills many more colony members via the Prothor Viral Effect™. Plus the Prothor Hysteretic Binding Effect gives you prolonged Termite Defence.
